PROFILE

Full Stack Developer experienced in JavaScript, TypeScript, PHP, Node.js, React and Swift. Development of ERP modules for Dolibarr, AI integration into business applications (Claude API with tool use), SaaS products with payment integration and generative AI, and mobile applications in production. VPS server management, automated deployments and web security.

EXPERIENCE

ERP / Full Stack Developer — *Nubium Solutions* Nov 2025 — Present

Granada, Spain | Full-time (40h/week)

- Development and maintenance of a multi-client ERP ecosystem based on Dolibarr for clients across multiple sectors (food, tourism, construction, consulting, education, industrial refrigeration, hospitality).
- Creation of custom modules: electronic invoicing, time tracking with PWA and geofencing, WhatsApp Business API integration with AI, automated ticket system, among others.
- Built DoliAssistant, an AI assistant embedded in Dolibarr using the Claude API (tool use and vision) that fills in records from documents and photos (certificates, equipment nameplates, invoices) and queries ERP data. Deployed in 8 client ERPs.
- Added AI-powered incident analysis to the ticket system, with read-only access to the client instance, secret masking, access logging and a monthly spending cap. Developing an AI invoice reader that generates accounting imports for A3.
- Built custom industry solutions: digital logbook for refrigeration installations compliant with Spanish RSIF and F-gas regulations with DOCX/PDF generation, public procedures portal with handwritten signatures stamped on PDF for a vocational school, food traceability with QR codes, and Moodle progress imports for subsidized training.
- Contributing to a multi-tenant time-tracking SaaS: Stripe billing with fiscal invoices issued from Dolibarr, and security and GDPR audit.
- Multi-instance deployment automation with backup, rsync, git sync and SQL execution across multiple simultaneous instances.
- Development of commercial catalogs, billing dashboards, digital signatures, document OCR and email tracking.
- VPS server administration via SSH. CI/CD with GitHub Actions and automated deployments. Version migrations with zero downtime.
- Resolved a malware incident on a shared hosting server: starting from the infection report, analyzed around 500 websites to assess the scope, identified the entry points (unauthenticated remote code execution backdoors), cleaned around 100 websites and hardened the server to prevent reinfection.

Web Development Intern — *AirCury, Granada* Mar — Apr 2025

- Front-end development, code reviews and responsive web design.

Web Development Intern — *Evasión Publicidad, Granada* 2025 (3 weeks)

- Internship as part of the Professional Certificate in Web Application Design and Development.

PROJECTS

Taidlix | *Next.js 16, React 19, TypeScript, PostgreSQL, Drizzle ORM, Anthropic SDK, Stripe, FFmpeg, Puppeteer* taidlix.com

- Social media management SaaS: post scheduling, analytics, unified inbox and PDF reports with AI-written insights for Facebook, Instagram, TikTok and LinkedIn.
- Integration with official Meta, TikTok and LinkedIn APIs. AI engine with Claude for caption generation, carousels and editorial calendar.
- Interactive video editor with canvas and FFmpeg processing. Auth, Stripe payments, Redis rate limiting. Deployed on own VPS with PM2.
- Up to 4K video publishing, GDPR compliance (email verification, account deletion with grace period and data export) and off-site backups.
- In pilot with clients: AI-generated monthly content proposals, approval via Telegram and automatic publishing.

AI WordPress Site Builder | *Node.js, Claude Code, Elementor MCP, WordPress, Elementor, Playwright, Docker, SSH*

- Tool that builds a client's WordPress site end to end from their data (notes, current website, photos and logo): brief, HTML mockup for approval, site setup, media upload and page-by-page build in Elementor.
- Orchestrates headless Claude Code sessions that build each page through the Elementor MCP and review the result with automated screenshots.
- Built-in design and accessibility rules (mobile first, AA contrast); missing data is flagged on the page instead of being made up.

CookieBoy | *PHP, JavaScript, MySQL, Stripe, WordPress APIs, GTM Consent Mode v2* cookieboy.es

- GDPR plugin for WordPress: automatic cookie detection, banner in 7 languages, auto-generated policy and Google Consent Mode v2.
- Custom licensing system with recurring payments via Stripe. Active SaaS product with real business model.

SocialRun | *Swift, SwiftUI, watchOS, HealthKit, Supabase* apps.apple.com/es/app/socialrun/id6754617429

- iOS app published on the App Store: social running competition with challenges, km tracking and push notifications. Apple Watch and HealthKit integration.

SecureScan | *Next.js, TypeScript, Supabase, Stripe, OpenAI* securescan-eight.vercel.app

- Web security scanner that detects exposed API keys and insecure configurations. Freemium model with Stripe and OpenAI-powered analysis.

EDUCATION

Higher Certificate in Multiplatform Application Development (DAM) — *Atlántida CIDEP FP, in progress* 2026 — 2027
Higher Certificate in Web Application Development (DAW) — *Atlántida CIDEP FP | Final grade 9.25/10* 2024 — 2026
Professional Certificate in Web Design and Development — *Albay Constructores* Mar — Aug 2025
Technology Baccalaureate — *Sagrado Corazón de Jesús*

TECHNICAL SKILLS

Frontend: React 19, Next.js 16, TypeScript, JavaScript (ES6+), Tailwind CSS, Bootstrap, Framer Motion, fabric.js, jQuery, HTML5, CSS3, Flexbox, CSS Grid, Responsive Design
Backend: Node.js, PHP 8.x, Python, PostgreSQL, MySQL/MariaDB, MongoDB, Firebase, Supabase, Drizzle ORM, NextAuth v5, Stripe SDK, REST APIs, PHPWord, PhpSpreadsheet, TCPDF
Mobile: Swift, SwiftUI, SwiftData, CloudKit, watchOS, HealthKit, React Native/Expo (in development)
AI/APIs: Anthropic SDK / Claude API (tool use, structured outputs, vision), OpenAI, Meta Graph API, TikTok API, LinkedIn API, WhatsApp Business API
CMS/ERP: WordPress, Elementor, Dolibarr, WooCommerce, Moodle (integration)
Infra/DevOps: Linux (VPS), PM2, Apache, Plesk, cPanel, GitHub Actions, Docker / Docker Compose, LibreOffice headless, incident response and malware cleanup, FFmpeg, ImageMagick, Puppeteer, Upstash Redis, rsync, SSH
Tools: Git, GitHub, VS Code, Cursor IDE, IntelliJ IDEA, Figma, Trello, Vercel, Netlify, pnpm, Jest, Cypress

CERTIFICATIONS & LANGUAGES

Cambridge English B2 First | **CCNA: Switching, Routing and Wireless Essentials** (Cisco)
Languages: Spanish (native) | English (B2 — Cambridge certified)
