PROFILE

Full Stack Developer specializing in SaaS product development and enterprise process automation. Experienced in JavaScript, TypeScript, PHP, Node.js and Swift building production platforms with self-managed infrastructure, payment systems and generative AI. VPS server management and automated deployments.

EXPERIENCE

ERP / Full Stack Developer — Nubium Solutions

Nov 2025 — Present

Granada, Spain | Full-time (40h/week)

- Maintain and extend a multi-client ERP ecosystem based on Dolibarr serving clients across 5+ sectors (food, tourism, construction, consulting, education).
- Build and ship 25+ custom modules: electronic invoicing, time tracking with PWA and geofencing, WhatsApp Business API integration with AI, automated ticket system, among others.
- Engineer and maintain a deployment automation system that pushes updates to 30 production instances simultaneously, reducing manual deployment time from ~1 hour to minutes.
- Collaborate in a 3-person development team building commercial catalogs, billing dashboards, digital signatures, document OCR and email tracking features.
- Administer multiple VPS servers via SSH. Manage CI/CD pipelines with GitHub Actions and automated deployments. Execute version migrations with zero downtime.

Web Development Intern — AirCury, Granada
